

THE BEST *care* FOR BREAST *care*

INCLUDES A HELPING HAND TO GUIDE
YOU THROUGH TREATMENT

At The Hospital of Central Connecticut, that strong and helpful hand is provided by Donna Boehm, R.N., our nurse navigator. Donna helps to arrange appointments, explains what's going on, and in general, guides women through the process so they are not alone.

A nurse navigator is just one component of the comprehensive breast program available at The Hospital of

Central Connecticut. Our services range from the most advanced digital mammography to aid in early detection to a full line of sophisticated breast cancer treatments, close to home. To speak with Donna, please call 860-224-5900, X6307. For more information on our breast cancer program, visit www.thooc.org
