

# THE BEST *care* FOR BREAST *care*

INCLUDES AN TEAM OF EXPERTS WHO REVIEW  
EACH BREAST CANCER CASE

Not all breast cancers are the same. So how do you know you are getting the right treatment? At The Hospital of Central Connecticut, our team of physicians and other experts reviews each breast cancer case to ensure each woman receives the treatment that's best for her. This team approach not only makes treatment easier, it may save lives.

And it's only one part of our comprehensive breast program. From digital mammography and other sophisticated imaging techniques, to the most sophisticated radiation, chemotherapy and surgical treatments, we have what women with breast cancer need, close to home. For more information on our breast cancer program, call 860-224-5900, X6307, or visit our website, [www.thocc.org](http://www.thocc.org).
