

*Sometimes expectant moms — and
their babies — need some extra attention.*

These experts provide it.

When you're expecting, you want your hospital to have specialists available, around the clock, for both you and your baby. **That's why we have maternal-fetal medicine specialists on staff.** They help to ensure that our expectant moms and their babies get whatever care they need, whenever they need it.

For a referral to one of our ob-gyns,
please call 1-800-321-6244.
